

SAVE THE DATE:

Oxurion to host Virtual R&D Investor Day on 15 October 2020

Leuven, Belgium, October 5, 2020 – 10 am CET – [Oxurion NV](#) (Euronext Brussels: OXUR), a biopharmaceutical company developing next generation standard-of-care therapies for diabetic macular edema (DME), will host a **virtual R&D Investor Day on the 15 October 2020 at 5.30pm CET/4.30pm BST/ 11.30am ET**.

The meeting, intended for investors and analysts, will provide an overview of the Company's development pipeline and corporate strategy, which is focused on successfully creating an industry leading DME franchise.

Oxurion is currently developing THR-149 and THR-687, two novel drug candidates with non-VEGF modes of action, which together have the potential to deliver a new standard of care for all patients with DME.

Presentations will be delivered by members of Oxurion's senior management team and by two **global Key Opinion Leaders in the field of retinal vascular disorders**:

- **Ramin Tadayoni, M.D., Ph.D.** is Professor of ophthalmology at University of Paris. He is head of the Ophthalmology Departments at Lariboisière, St Louis and Rothschild Foundation Hospitals in Paris, France.
- **Arshad Khanani, M.D., M.A.**, is Managing Partner, Director of Clinical Research, Director of Fellowship at Sierra Eye Associates, and Clinical Associate Professor at the University of Nevada, Reno, US.

The agenda and details of how to join the meeting will be available in an invitation and on the Company's website (www.Oxurion.com) which will be issued closer to the time of the event.

END

About Oxurion

Oxurion (Euronext Brussels: OXUR) is a biopharmaceutical company developing next generation standard of care ophthalmic therapies, which are designed to better preserve vision in patients with diabetic macular edema (DME), the leading cause of vision loss in diabetic patients worldwide.

Oxurion is building a leading global franchise in the treatment of DME, based on the successful development of its two novel therapeutics:

- THR-149, a plasma kallikrein inhibitor being developed as a potential new standard of care for DME patients who respond sub-optimally to anti-VEGF therapy.

THR-149 has shown positive topline Phase 1 results for the treatment of DME. The Company is currently conducting a Phase 2 clinical trial evaluating THR-149 with DME-patients who previously responded sub-optimally to anti-VEGF therapy.

THR-149 was developed in conjunction with Bicycle Therapeutics PLC (NASDAQ: BCYC)

- THR-687, is a pan-RGD integrin inhibitor, that is initially being developed as a potential new standard of care for all DME patients. Positive topline results in a Phase 1 clinical study assessing it as a treatment for DME were announced in January 2020. THR-687 is expected to enter a Phase 2 clinical trial by mid-2021.

THR-687 is an optimized compound derived from a broader library of integrin inhibitors in-licensed from Galapagos NV (Euronext & NASDAQ: GLPG).

Oxurion is headquartered in Leuven, Belgium, and is listed on the Euronext Brussels exchange under the symbol OXUR.
